

INTERNET AND E-MAIL

Lesson-8

Class-7

INTRODUCTION:

- ➡ The Internet is a worldwide system of interconnected computer networks.
- ➡ It is also known as a network of networks.
- ➡ Computers on the Internet exchange information using TCP (Transmission Control Protocol) / IP (Internet Protocol).
- ➡ Computers are connected through telecommunication networks.
- ➡ The World Wide Web (WWW) is a system of Internet servers.
- ➡ The WWW uses HTTP (Hyper Text Transfer Protocol).
- ➡ Web documents are commonly formatted using HTML (Hypertext Mark-up Language).
- ➡ Internet resources can be viewed using a web browser.
- ➡ E-mail allows messages to be sent to any corner of the world within seconds.
- ➡ E-mail supports mass communication, where one sender can reach many receivers.
- ➡ Internet search engines provide information retrieval to users.
- ➡ The Internet provides effective communication through chatting, e-mail and video conferencing.
- ➡ The Internet helps people and companies communicate and perform various activities online.

ADVANTAGES AND DISADVANTAGES OF INTERNET:

The Internet is a worldwide network of interconnected computers that allows people to share information, communicate, study, do business, and access online services.

Advantages of Internet:

1. Provides unlimited information through search engines.
2. Provides effective communication through chatting and e-mail.
3. Supports video conferencing/ Video Call.
4. Helps businesses and companies perform online transactions.

5. Allows the exchange of ideas and materials among professionals and experts.
6. Provides online study, training and seminars.
7. Provides access to worldwide media.

Disadvantages of Internet:

1. Illegal or inappropriate materials can be found on the Internet.
2. Internet addiction can disturb a person's way of living and professional activities.
3. Criminals may use the Internet for spreading computer viruses.
4. The Internet can be misused for fraud and other harmful activities.

Important Terms Used in the Internet

1. Browser (Web Browser):

Software used to access and display information on the World Wide Web, such as Chrome, Firefox, Safari, and Internet Explorer.

2. FTP (File Transfer Protocol):

FTP is a communication protocol used to transfer files between computers over the Internet. It allows users to upload files to a server and download files from a server.

3. HTTP (Hypertext Transfer Protocol):

HTTP is a communication protocol used to transfer web pages and other resources over the Internet. It allows a web browser to communicate with a web server and display web pages to users.

4. URL (Uniform Resource Locator):

The address used to locate resources or services on the World Wide Web.

5. Web Page:

A single hypertext document or page that is part of a website, usually created using HTML.

6. Search Engine:

A service used to search and find information on the Internet. Google is a common and popular search engine.

7. E-mail:

E-mail is an electronic method of sending and receiving messages through computers and the Internet.

8. E-mail Account:

A valid identification name or ID of an authorized user used for e-mail services.

E-mail

INTRODUCTION:

- ➡ E-mail means electronic mail, which is used to send and receive messages through the Internet.
- ➡ It allows messages to be sent to anyone, anywhere in the world within a short time.

- ➡ E-mail is faster than ordinary postal mail.
- ➡ It can be used to send text messages and files as attachments.
- ➡ An e-mail address is also called an e-mail ID and identifies a person's mailbox on the Internet.
- ➡ Each person has a unique e-mail address.
- ➡ The general format of an e-mail address is username@hostname, for example, mohan@gmail.com.

E-mail Account

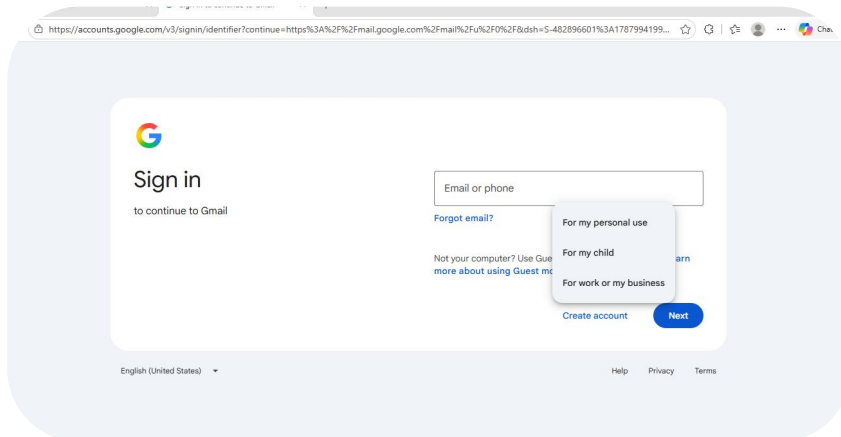

INTRODUCTION:

- ➡ An e-mail account is a valid identification name or ID of an authorized user.
- ➡ It is used to send and receive e-mails through the Internet.
- ➡ An e-mail address is also called an e-mail ID.
- ➡ Each person has a unique e-mail address.
- ➡ An e-mail address has two main parts: username and hostname.
- ➡ The general format is username@hostname.
- ➡ Example: rawatchettrimukesh5@gmail.com

Creating a Gmail Account:

Some steps for creating Gmail Account:

1. Open a web browser and visit Gmail.
2. Click Create Account and select for myself.

3. Enter your full name, username.

6. A password, phone number and recovery e-mail can be added for account security and recovery.

The screenshot shows the 'Create a strong password' step of the Google account creation process. The URL in the browser's address bar is https://accounts.google.com/lifecycle/step/signup/password?TL=ACv9tzGKvWd3XDZG4CNezv9YXTiNf338a09eY89r1gba7DhC7v2j1TRP_jbEE&cont.... The page features the Google logo and the heading 'Create a strong password'. Below the heading is a subtext: 'Create a strong password with a mix of letters, numbers and symbols'. There are two input fields: 'Password' with the value 'Admin0-2005' and 'Confirm' with the value 'Admin0-2005'. A checkbox labeled 'Show password' is checked. A blue 'Next' button is at the bottom right. At the bottom left, it says 'English (United States)' with a dropdown arrow. At the bottom right, there are links for 'Help', 'Privacy', and 'Terms'.

The screenshot shows the 'Confirm you're not a robot' step of the Google account creation process. The URL in the browser's address bar is https://accounts.google.com/lifecycle/step/signup/startmsmsidv?TL=ACv9tzGKvWd3XDZG4CNezv9YXTiNf338a09eY89r1gba7DhC7v2j1TRP_.... The page features the Google logo and the heading 'Confirm you're not a robot'. Below the heading is a subtext: 'Get a verification code sent to your phone'. There is a 'Phone number' input field with the value '97070311'. Below the input field, it says 'Google will verify this number via SMS (charges may apply)'. A blue 'Next' button is at the bottom right. At the bottom left, it says 'English (United States)' with a dropdown arrow. At the bottom right, there are links for 'Help', 'Privacy', and 'Terms'.

The screenshot shows the 'Add recovery email' step of the Google account creation process. The URL in the browser's address bar is https://accounts.google.com/lifecycle/step/signup/addrecoveryemail?TL=ACv9tzGKvWd3XDZG4CNezv9YXTiNf338a09eY89r1gba7DhC7v2j1TRP_jb.... The page features the Google logo and the heading 'Add recovery email'. Below the heading is a subtext: 'The address where Google can contact you if there's unusual activity in your account or if you get locked out.' There is a 'Recovery email address' input field. At the bottom, there are two buttons: 'Skip' and 'Next'. At the bottom left, it says 'English (United States)' with a dropdown arrow. At the bottom right, there are links for 'Help', 'Privacy', and 'Terms'.

7. Read and accept the Terms and Conditions to complete the account creation.

The screenshot shows the Google 'Privacy and Terms' page. At the top left is the Google logo. The title 'Privacy and Terms' is centered. The text explains that creating a Google Account requires agreeing to the Terms of Service and Privacy Policy. It lists key points about data processing, such as storing account information, using data for services like Gmail and YouTube, and collecting activity data. A 'You're in control' section mentions account settings and the ability to change them. At the bottom right are 'Cancel' and 'I agree' buttons. The footer includes a language dropdown set to 'English (United States)' and links for 'Help', 'Privacy', and 'Terms'.

 **Privacy and Terms**

To create a Google Account, you'll need to agree to the [Terms of Service](#) below.

In addition, when you create an account, we process your information as described in our [Privacy Policy](#), including these key points:

Data we process when you use Google

- When you set up a Google Account, we store information you give us like your name, email address, and telephone number.
- When you use Google services to do things like write a message in Gmail or comment on a YouTube video, we store the information you create.
- We collect info about your activity in Google services, including info like the videos you watch on YouTube, the terms or images you search for, apps installed from Play that you open on your Android device, device IDs, IP addresses, cookie data, and location. [Learn more about location information](#)
- We also process the kinds of information described above when you use apps or sites that use Google services like

... devices for these purposes. For example, depending on your account settings, we show you ads based on information about your interests, which we can derive from your use of Search and YouTube, and we use data from trillions of search queries to build spell-correction models that we use across all of our services.

You're in control

Depending on your account settings, some of this data may be saved as history in your Google Account. We treat this data as personal information. Your personalization and history settings for Search services, YouTube, Ads, Play, and Web & App Activity will be on when you create your account. You can change these settings by selecting "More options" below. You can always change these and other privacy settings later by visiting [account.google.com](#).

8. Your account is created.

CHECKING E-MAIL

1. Open the Gmail website.
2. Log in using your username and password.

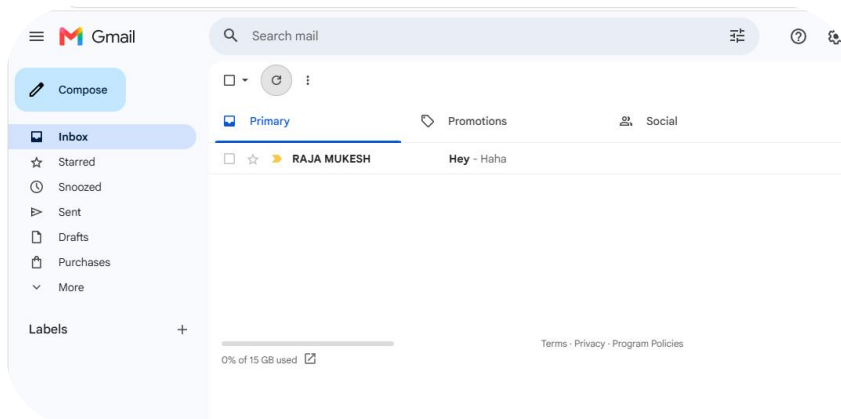

3. Click the Inbox button.

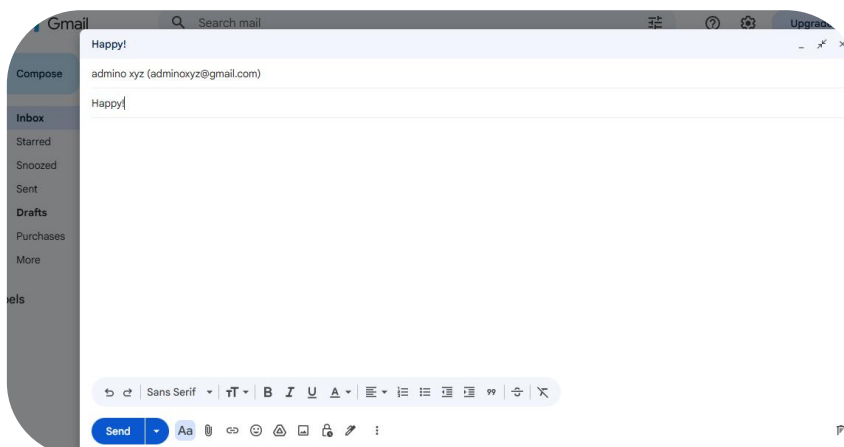

4. Click on the e-mail you want to read.

COMPOSING E-MAIL

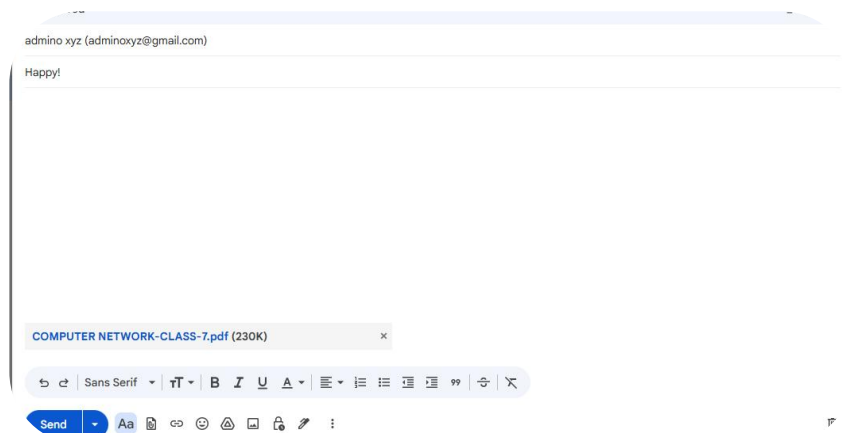

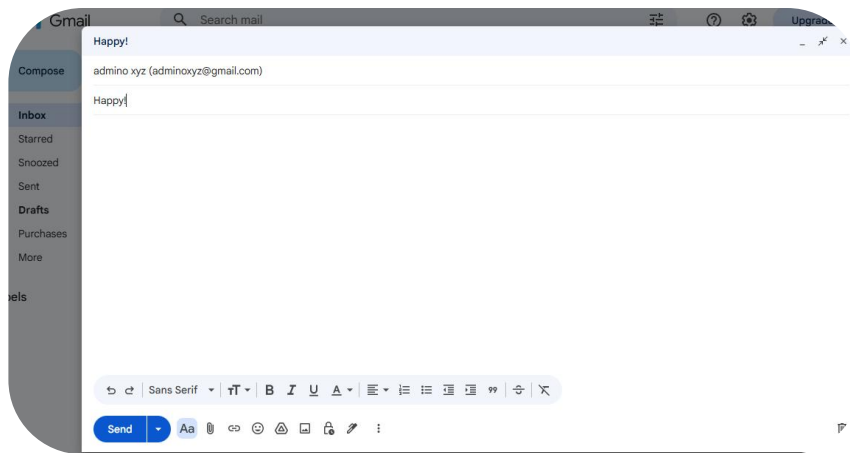

1. Click the Compose button.

2. Enter the recipient's e-mail address and Enter the subject of the e-mail..

3. Type your message in the main body.
4. Use formatting options if needed.
5. To send a file, click Attach Files and select the required file.

6. Finally, click Send.

LOGGING OUT

Click the Google account button at the top-right corner and select Sign out. This helps prevent unauthorized access to the account.
